## Prevention BMPs for Land Managers

Invasive plants can degrade the ecological integrity of wildlands, and land managers employ a range of tactics to reduce this damage. While controlling established infestation is important, prevention is the most cost-effective approach to reduce this damage.

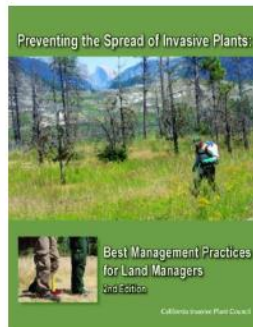

This manual presents a set of voluntary guidelines and ready-to-use checklists to help those managing wildlands in California to prevent the accidental spread of terrestrial invasive plants.

### Preventing the Spread of Invasive Plants: Best Management Practices for Land Managers

This manual is available as a free download. Click here for a PDF of BMP for Land Managers. (38 pp., 4.25 MB)

#### Contents:

- Prioritizing BMP Implementation (Updated)
- Pre-Activity Assessment Outline
- Ch. 1. Planning BMPs
- Ch. 2. Project Materials BMPs
- Ch. 3. Travel BMPs
- Ch. 4. Tool, Equipment and Vehicle Cleaning BMPs
- Ch. 5. Clothing, Boots and Gear Cleaning BMPs
- Ch. 6. Waste Disposal BMPs
- Ch. 7. Soil Disturbance BMPs
- Ch. 8. Vegetation Management BMPs
- Ch. 9. Revegetation and Landscaping BMPs
- Ch. 10. Fire and Fuel Management BMPs (NEW!)
- 10.1 Fire Management Planning BMPs (NEW!)
- 10.2 Fuel Management BMPs (NEW!)
- 10.3 Fire Suppression BMPs (NEW!)
- 10.4 Post-Fire Activity BMPs (NEW!)
